

# DHL CLOSE TO YOU

Delivery at Economy price  
without map integration

Make use of **Economy product's lower prices,**  
**without map integration!**

CHOOSE **DHL CLOSE TO YOU**  
A NEW, FAST, CONVENIENT AND **COST-FREE SOLUTION**

## SEE HOW IT WORKS!

**1. The SHOPPER**  
appreciates convenience  
and really likes to have  
a choice!

**2. The E-SHOP**  
has the option of presenting  
various forms of delivery  
in the shopping basket, e.g.,  
▶ to-door delivery  
▶ **DHL CLOSE TO YOU** delivery

**3. The SHOPPER**  
chooses **DHL CLOSE TO YOU** delivery

**4. DHL**  
Based on the coordinates of the consumer's address, DHL indicates the optimal  
delivery point (DHL BOX machine or POP point). If they are not around,  
DHL will deliver the package to door (to the address indicated):

▶ the e-shop does not need to integrate the map ▶ the shopper wastes no time for point selection

### Add **DHL CLOSE TO YOU** and gain:

- ▶ **Convenience** – fast, simple and cost-free integration
- ▶ **Money** – delivery at Economy price
- ▶ **Satisfied Customer** – quick choice of delivery, no need to search for a point on the map

### HOW TO IMPLEMENT **DHL CLOSE TO YOU** IN YOUR SHOP?

In order to integrate with DHL's api for the **DHL CLOSE TO YOU** option, you need to:

- ▶ use the createShipment or createShipments methods from wsdl <https://dhl24.com.pl/webapi2/> or use the createShipment method from wsdl <https://dhl24.com.pl/servicepoint>
- ▶ specify the SP product in api query
- ▶ provide details of the Consignee:  
name, post code, town/city, street, house number, e-mail or telephone number (or both)

**Note:** do not include the point number in your enquiry

DHL will select the nearest DHL BOX machine or POP point based on your address data.  
If the machine or point is far away, the courier will deliver the parcel to your door and send by e-mail  
or by a text message an information on the status of your shipment.

This option is also available in **DHL24** and TTW file import.
